## Notes for 54c from Page 1

- PRR, Southern, and others used Adlake swing out windows (hinged at top, bolts at bottom). To replace the single payne glass in these cars with double glazing you must relocate the hangers. Bolt in replacement hanger, 316 stainless steel makes it a 20 minute job!

Window leaks - side sheet water leaks. I am investigating a new rubber extrusion that will cover the aluminum inner frame completely and lip over the side sheet. Ends the water leaks and avoid side sheet replacement as it will cover up that swollen gap.
